LEVEL C 3

Use case 001 Pay his or her bills by attaching a valid credit card to them 3

Use case 002 Start a process that computes the bills that every manager must pay. The input to the process must be the month and the year for which the bills must be generated. Note that the system must prevent the administrator from running the process on a month or a year for which it's already been run. By default, the system must pro-pose the current month and year as input to the process 4

Use case 003 Show a listing of default debtors. A manager is considered a default debtor when he or she has at least three unpaid bills 5

Use case 004 Ban default debtors, which prevents them from logging in to the system and users from participating in their raffles 6

Use case 005 Display a dashboard with the following information 7

LEVEL B 8

Use case 006 Browse his or her curriculum 8
Use case 007 Manage his or her curriculum, which includes displaying and editing it 9
LEVEL A..... 10
Use case 008 See the corresponding Hall of Fame, which consists of a listing with the winners and the users who have entered at least 75% the average number of codes entered by the users of the system 10
Additional tests..... 11

LEVEL C
